

Travel to the country of White Water (summer 2021)

The Mountain Altai was the cradle for many nations. Tribes of Scythes, Huns and Turks starting from that area spread around the endless territories of Eurasia. Many archaeological objects were found here and these discoveries on their historical and cultural values occupy an important part in the World Cultural Heritage. Ancient barrows and rock paintings, interesting legends, mountain lakes with clean water, speedy mountain streams and snow peaks are waiting for the traveler on this route. Making acquaintance of the unique cultural traditions of Altai people allows the traveler to get a deep insight into the past to feel the connections between times and to understand the beauty of the presence. The way from Novosibirsk to Verkhny Uymon village is similar to the route of the Central Asia expedition of Nikolay Perikh (1925 - 1928).
